

RUBBER SEALS

COWL VENT SEAL

The VS-6491 is manufactured as a cowling seal for older aircraft models that used the old felt style seal for sealing around the cowling and serving as an engine baffle seal. It is used to seal between the aircraft cowling and the engine so that proper air flow can happen across the aircraft's engine. It is sold in a 9 Ft package with a 1/2 bulb. Part Number : [VS-6491](#)

Fuel & Oil Resistant Buna Cover

1/2" OD Bulb

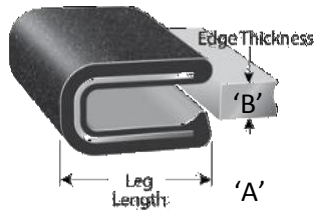

9 Foot Package

Double Stitched

TRIM LOCK

The Trim Lock is a metal reinforced trim "U" Channel. It has a textured/grain finish to it and is available in either a white or black color. It does meet the requirements of the FAR 25.853B Burn test. It has a recommended temperature range of -20 to 150 F. This material has many uses such as finishing sheet metal edges, plastic edges and many other general purpose uses

PART #	DIMENSION "A"	DIMENSION "B"
